

Save the Sea - is it worth it?

Monday 2.6.2014 at 13.30-15.15

Åbo Akademi University, Tehtaankatu 2, Turku

Is the Baltic Sea worth our efforts to stop eutrophication or are our actions just a waste of money? Can science offer a working prescription for a sick sea? How can we overcome the challenge of getting our message through? Join us for a multi-sectoral dialogue on the Baltic Sea environmental problems with experts representing fields of ecology, economy, communication and law!

Chair: Head of Husö biological station and the biological collections,
Docent **Johanna Mattila**, Åbo Akademi University, Finland

Panelists and themes:

Prescribing science?

Researcher **Johanna Stadmark**, Department of Geology, Lund University, Sweden

Wasting our money?

Professor **Markku Ollikainen**, Environmental and Resource Economics, University of Helsinki, Finland

Speaking to deaf ears? Critical aspects of Baltic Sea Communication

Professor **Kaja Tampere**, Communication Management, Tallinn University, Estonia

Making the rules work?

Professor II **Henrik Ringbom**, Scandinavian Institute of Maritime Law, Oslo, Norway and Adjunct Professor (Docent) in Maritime Law and the Law of the Sea, Åbo Akademi University, Finland

Baltic Sea Challenge: a tool for Baltic Sea friendly organisations

Registration: by 12 May 2014 at www.balticseachallenge.net
